DETAILED ACTION

1. Claims 8-22 are pending.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 19, 2005 has been entered.

Response to Arguments

3. Applicant's arguments, see pg. 7, last paragraph and pg. 8, 2nd paragraph, last sentence, filed May 19, 2005, with respect to claims 8-22 have been fully considered and are persuasive. Specifically, although Smaha teaches receiving audit conditions to be detected using non-limiting specification formulas expressing fraudulent entry or attack patterns or abnormal operations, to be verified by examining records of a log file of a computer system, Smaha does not teach expanding these formulas into Horn clauses and resolving the Horn clauses. Moreover, the teaching of Thuraisingham is directed to representing rules to represent knowledge such as constraints, real-world data and conflict resolution, wherein these rules are expressed as Horn clauses, in which case the techniques of consistency and completeness can be used with the rules

to detect security violations in a database; the Thuraisingham prior art is directed to database security and the expression of these types of rules into Horn clauses, not formulas expressing fraudulent entry or attack patterns as Horn clauses as the claims of the instant application are directed. Hence, the combined teaching of Smaha and Thuraisingham does not cover using formulas expressing fraudulent entry or attack patterns to be verified by examining records of a log file of a computer system, and expanding these formulas into Horn clauses and resolving the Horn clauses. Finally, Schoning discloses resolving Horn clauses to identify consistency in the set of clauses, but does not teach the technique within a security framework. As such, the claimed invention is not covered by the prior art of record.

Allowable Subject Matter

4. Claims 8-22 are allowed.
